# TO SPRAY MORE - 2019

## BY GRACO

Attention Loyal SPP Customers,

There is new technology in the spray foam world and we want to make sure you're ahead of the game. This technology allows you to greatly improve your efficiency, consistency and overall performance and thanks to Graco's new "Freedom to Spray More" campaign, you can save big on these new tools and products.

### **Resistance Control Mode (RCM)**

Resistance Control Mode is a breakthrough technology that removes the need for temperature sensors and RTD cables in Graco hoses. Through first-of-its-kind proprietary Graco technology, the Reactor 2 proportioner measures and controls heat in Graco hoses without the RTD or FTS. This is a complete game changer and we're offering you a **FREE UPGRADE!**

### **Trade-In/Trade-Up**

Don't have a Reactor 2 spray machine? That's ok... Trade in your old decommissioned spray machine for a new Graco Reactor 2 proportioner and receive an additional 10-15% discount from Graco.

### **Heated Hose, Reactor App Hardware Kits and Ratio Control Kits**

Receive an additional 10-15% discount from Graco on all new Heated Hoses, Reactor App Hardware Kits, Ratio Assurance Hardware Kits, and on Heated Hose/Reactor App/Ratio Assurance Kit Bundles.

These tools and products will allow you to increase uptime, productivity and material yield, making your jobs easier and more productive. Stay on top of your game with the latest upgrades and get the technology your business deserves. Spray more, worry less.

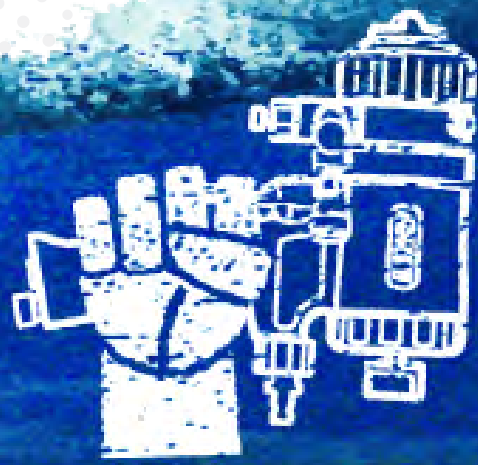

To take advantage of this promotion and to find out how you can save even more, call Spray Poly Parts at **850-640-0285**.

Sincerely Your Favorite SPF Distributor,

**SprayPolyParts**

# FREEDOM

## TO SPRAY MORE - 2019

### Free Software Upgrade - Resistance Control Mode (RCM)

Resistance Control Mode is a game changing technology that allows full temperature control of your Graco heated hose without the need for an RTD cable and/or a Fluid Temperature Sensor. RCM can be used on all standard Reactor 2 models.

#### Additional features included with software upgrade - version 4.01.001:

- Improved pressure imbalance control
- Removed low inlet temperature errors
- Smart Control ratio assurance feature
- Ratio monitor capability
- Reactor App functionality
- General error code reduction overhaul
- Improved motor control and efficiency

### Price Incentives from Graco

#### Reactor 2 Trade In/Trade Up Promotion - Now through 11/30/19

**Additional 10% discount** – on old Reactor models when traded in for Reactor 2

**Additional 15% discount** – on competitive models (including Gusmer and GlasCraft) when traded in for Reactor 2
